

Fact file

UDAYANA UNIVERSITY

WELCOME!

The 2023 QS Asia University Rankings will be published on topuniversities.com on 08 November 2022.

This file provides the detailed results for your institution and the data that has been used to calculate the ranks and scores.

It should also provide you with useful information for any media communication you might need to prepare prior to launch.

Country eligibility was refined, and is now fully based on UN's M49 Standard. All countries, classified by UN as Central, Southern, Eastern or South-Eastern Asia, are eligible for QS World University Rankings: Asia. This resulted in the addition of five Central Asian countries (Kazakhstan, Uzbekistan, Kyrgyzstan, Tajikistan, and Turkmenistan), previously published under QS EECA Rankings, and Iran.

METHODOLOGY:

INDICATORS & WEIGHTINGS

The **QS Asia University Rankings** have been published since 2009. The method retains key indicators of the global ranking, such as Academic Reputation, Employer Reputation, and Faculty to Student Ratio, but also considers a set of performance metrics carefully tailored for the region.

	Academic Reputation Taken from the annual survey conducted by QS designed to evaluate the perceptions of academics from around the world regarding the best institutions in terms of research. This year, responses from over 151,000 academics were recorded globally.
	Employer Reputation Taken from the annual QS survey aimed at gathering the views of employers around the world on the institutions providing the best professionals. This year, responses from over 99,000 employers were analysed.
	Faculty Student This is the ratio between the number of academic staff and number of students. A higher number of teachers per student is an indirect indicator of the commitment of the institutions to high-quality teaching.
	Staff with PhD This indicator attempts to assess the quality of training of the academic staff, detecting the proportion of them that have reached the highest level of education in their area of expertise. This is an indirect measure of the commitment of universities to high-quality teaching and research.
	Citations per Paper This ratio measures the average number of citations obtained per publication, and is a proxy of the impact and quality of the scientific work done by universities. Underlying data of papers and citations is indexed by Scopus. The paper and citations counts are normalized in an attempt to equalize the influence of citations across the five broad faculty areas.
	Papers per Faculty This indicator seeks to determine the average number of scientific publications (papers) produced per faculty and evaluates the productivity of research institutions. Data is extracted from Scopus. Indexed papers in the last five full years are used (from 2016 to 2020 for the 2023 edition). The paper count is normalized, ensuring that citations achieved in each of the five broad faculty areas are weighted equally.
	International Research Network Using data provided by Scopus, this indicator assesses the degree of international openness in terms of research collaboration for each evaluated institution. The Margalef Index, widely used in the environmental sciences, has been adapted to estimate the richness of the selected international research partners for a given institution.
	International Faculty The International Faculty Index is simply based on the proportion of faculty members that are international. It is a proxy measure for how internationally attractive the university is to academic staff.
	International Students The International Students Index is based on the proportion of students that are international. It is a proxy measure for how internationally attractive the university is to students.
	Inbound Exchange Students Total number of students attending your university on international exchange programs for at least 1 semester in the last annual reporting period.
	Outbound Exchange Students Total number of students registered who have attended another university on an exchange program for at least 1 semester in the last annual reporting period.

Find the digital campaign package to suit your audience and budget

Use our digital expertise to reach interested and qualified students around the world. Choose from a range of packages and products to suit your brand awareness strategy and budget.

Advanced Profiles

58 million visitors to QS websites

Digital display adverts

250 million impressions a year

Sponsored content

520K impressions a month

Newsletters & emails

420K reach

With our own platforms to reach students worldwide, QS is your ultimate student recruitment partner.

Connect directly

Join worldwide MBA-focused recruitment events, both in-person and online.

Show your expertise

Sponsor editorial content with a 10% average click-through-rate, including MBA or business-focused articles, and participate in webinars.

Stay visible

Upgrade to a QS Advanced Profile and benefit from increased search traffic and rich content features. Publish targeted digital display adverts with 250 million global impressions a year on our student-facing websites.

Increase your social reach

Feature on our TopUniversities.com and TopMBA.com social channels, which have the highest combined reach of 875K+ amongst our competitors.

"The Swedish Institute's email campaign generated 86 leads, and through their display campaign and sponsored article they generated a further 145."
